Projects

BookMyRide - Car & Bus Booking System| *MERN Stack (MongoDB, Express.js, React, Node.js)* **Jan 2026 - Feb 2026**

- Developed a full-stack ride booking platform with search, booking, and management features for cars and buses.
- Built RESTful APIs using Node.js, Express, and MongoDB for handling users, bookings, vehicles, and routes.
- Integrated real-time features using Socket.io along with seat selection and promo code functionality.
- Designed a responsive frontend using React (Vite) and Tailwind CSS with an admin dashboard for system management.
- Repository Link: https://github.com/manisai2463/RealTimeCab

FounderForge – Entrepreneur Network | *PHP, HTML, CSS, JavaScript* **Mar 2025 - Apr 2025**

- Developed a web platform connecting entrepreneurs to collaborate, share ideas, and build innovative projects.
- Built dynamic and responsive user interfaces using HTML, CSS, and JavaScript for seamless user interaction.
- Implemented backend functionalities using PHP for user management and data handling.
- Designed features to enable networking, communication, and collaboration among users.
- Repository Link: https://github.com/manisai2463/Entrepreneurial-Network-web-development

Custom Browser | *HTML5, CSS3, JavaScript (ES6+), Google Books APIs, Local Storage* **Feb 2025 - Mar 2025**

- Developed a chat-based web app to fetch and display book details using the Google Books API.
- Implemented conversational UI for querying summaries, themes, characters, and ratings.
- Integrated real-time API calls for dynamic retrieval of book metadata and cover images.
- Designed a responsive messenger-style interface with dynamic DOM updates and smooth interactions.
- Repository Link: https://github.com/manisai2463/AI-Project

Summer Training

Board Infinity – Data Structures & Algorithms Training - Link **Jun 2025 - Jul 2025**

- Completed an intensive training program on Data Structures and Algorithms with hands-on problem solving and coding practice.
- Strengthened analytical and problem-solving skills through continuous coding sessions and algorithmic challenges.
- Gained practical experience in core topics including stacks, trees, graphs, dynamic programming, and recursion.
- Developed a 2D Snake Game project demonstrating stack data structure concepts in a real-time interactive system.
- Received mentorship from industry professionals and training in writing efficient, interview-ready code.

Certificates / Certifications

Cloud Computing **Apr 2025**
NPTEL, Swayam — Certificate Link

Legacy Responsive Web Design V8 **Nov 2023**
FreeCodeCamp — Certificate Link

Skills

Languages: Python, C++, Java, JavaScript

Technologies/Frameworks: React JS, Node JS, MongoDB, Git, GitHub, Ubuntu

Domain Skills: Data Structures and Algorithms, Problem-Solving, Responsive Web Design, Scripting in and JavaScript

Education

Lovely Professional University **2023 – Present**
Bachelor of Technology - Computer Science and Engineering — CGPA: 6.30 *Phagwara, Punjab*

Narayana Junior College **2022 – 2023**
Intermediate (PCM) — Percentage: 76.90% *Vijayawada, Andhra Pradesh*

Sri Viswasanthi Educational Institutions **2020 – 2021**
Matriculation — Percentage: 91.6% *Vijayawada, Andhra Pradesh*
